

GlobTek is proud to announce a new product line which compliments the total power solution offered to our customers. GlobTek has opened Ni-Cd & Ni-MH battery production in Mainland China. By manufacturing both batteries & battery chargers, GlobTek is able to provide a complete power solution, right from the design stage. This concept allows our customers to reduce their supplier base while still receiving cost savings.

GlobTek's Battery Division is committed to making quality products and providing best service to set up our characteristic company culture, establish our company image as striving for sincerity, unity, reality and continually bringing forth new ideas. Through which we are able to establish the first-rate staff, manufacture the first-rate product. In production, we strictly observe the ISO 9002 quality system as well as several Statistical Process Control Measures (SPC). With the joint effects of strong QC staff, use of advanced technology, GlobTek can offer you high quality products. Also as a successful company, we pay special attention to scientific management, application of all new technology, and above all, bringing forth new ideas into every aspect of our work.
